Chemical Biology Position (Postdoctoral Associate)

The Department of Chemistry at North Carolina State University invites outstanding applications for an NIH funded, full time, 12-month position (with a possibility of renewal) of a Postdoctoral Research Associate, under the direction of Dr. Alexander Deiters.

The broad objective of the project is to develop light-activated tools for the regulation of gene function. To be considered, applicants must have a Ph.D. in a biological or related discipline. Experience with modern molecular biology techniques is required and expertise in RNA biology and/or gene regulation is preferred. The ideal candidate will be highly motivated, open-minded, and enthusiastic about working in the laboratory with scientists at all levels of training. Compensation is commensurate with experience.

Please send a detailed cover letter, curriculum vitae, and at least two letters of recommendation to Dr. Alexander Deiters, Department of Chemistry, North Carolina State University, Campus Box 8204, Raleigh, NC 27695-8204. The position will remain open until a suitable candidate is found. Informal inquiries are encouraged and should be directed to alex_deiters@ncsu.edu.

North Carolina State University is an Equal Opportunity/Affirmative Action Employer. In addition, NC State University welcomes all persons without regard to sexual orientation.
