ALGEBRA SEMINAR

Monday, February 28, 2005

Professor Tom Lada
NC State University

Symmetric Brace Algebras

ABSTRACT: We will review the definitions of both symmetric and non-symmetric brace algebras, along with the fundamental examples. We will then outline some current work on free symmetric brace algebras and their relation to free pre-Lie algebras.

3:40 - 4:30 pm HA 335

Faculty and Students are invited to attend.
Please note the change in day.
