## **OBJECTIVE**

To get out of the classroom and learn all those things that school just cannot teach you.

## **SUMMARY**

At school I've learned many techniques and tools, while developing my methods and process. I have experience with photography, illustration, painting, stenciling, laser-cutting, and pottery. I've also worked in all those necessary computer programs, such as, Photoshop, Illustrator, InDesign (in it right now), Dreamweaver, Flash, and AfterEffects. I've made pieces in print and digital media, from books and stickers to video and web.

I enjoy working on all sorts of projects and don't prefer any one program or medium over another. Each presents its own challenges, advantages, and opportunities. I'm hoping to do a variety of work as an intern, so I can expand my knowledge and improve as a designer.
