Publications

Journal Papers

30. "Dynamic bandwidth allocation by using efficient threshold reporting for quality of service in Ethernet passive optical networks", Yeon-Mo Yang, Ji-Myong Nho,

Refereed Conference papers

19. "SLA-based resource allocation in cluster computing systems", Kaiqi Xiong and Harry Perros, IEEE International Parallel and Distributed Processing Symposium (IPDPS'08).

30. "Resource optimization subject to a percentile response time SLA for enterprise computing", Kaiqi Xiong and Harry Perros, Globecom 2006;

34. “Performance Evaluation of an Optical Burst Switching Scheme for Grid Networks”, Xenia Mountrouidou, Harry G. Perros, Maged Beshai, GridNets 2005

36. Approximation Techniques for the Analysis of Large Traffic-Groomed Tandem Optical Networks", A.N. Washington, Chih-Chieh Hsu, Harry Perros, and Michael
Devetsikiotis, 38th Annual Simulation Symposium (ANSS-38 2005), 2-8 April 2005, San Diego, California

44. "A queueing network model of an edge optical burst switching node", L. Xu, H. Perros and G. Rouskas, INFOCOM 03.

70. "A lightweight software bus for prototyping problem solving environments" with R.

71. "k-reliable multicasting: throughput and delay analysis" with B. Kim and A.
Nilsson. ITC Seminar, Lund University.

72. "A computationally efficient algorithm for characterizing the super-position of
multiple heterogeneous interrupted Bernoulli processes", with K. Elsayed, 2nd
International Workshop on Numerical Solutions of Markov Chains, Raleigh,

73. "On the effective bandwidth of arbitrary on/off sources" with K. El-sayed. Proc. of
Performance of Communication Networks '95, Instabul, October 95.

74. "Throughput analysis of a selective repeat retransmission scheme for k-reliable
multicast" with Bongtae Kim and A. Nilsson. ICCC '95

75. "Approximate analysis of a multi-class open queueing network with class
blocking and push-out", with T. Atmaca and Y. Dallery, MASCOTS '94, Durham,

76. "m-MMBP characterization of the departure process of an m-MMBP/Geo/1/K
queue" with Park. Labetoulle and Roberts (Eds.), Proceedings of ITC 14, 1994,
75-84.

77. "Analysis of traffic measurements in the VISTAnet Gigabit networking testbed",
with A. Nilsson and H.-C. Kuo. High Performance Networking 94 (HPN),

78. "Throughput analysis of stop-and-wait retransmission schemes for k-reliable
1994.

79. "Tools and methodologies for high speed network design", with A. Nilsson and D.
Stevenson, Integrated Broadband Communication Networks and Services
Conference, Copenhagen, April 1993.

80. "Performance of bus allocation policies for an ATM switch under bursty arrivals
and correlated destinations", with A. Zaghoul and Y. Viniotis, IEEE 1st Int. Symp.
on Global Data Networking, Cairo, Egypt, Dec. 1993, 37-44.

87. "Adaptive polling schemes for an ATM bus with bursty arrivals", with Karlsson and Viniotis, ICC '91

Refereed Conference papers
