

Applied Cognitive Psychology Laboratory

The **Applied Cognitive Psychology Lab** at the Department of Psychology, North Carolina State University, focuses on understanding human attention and cognition, with applications of cognitive principles to human factors.

- selective attention and spatial cognition
- driving (aging and driving, driver distraction)
- interface design for information displays
- design of games for cognitive training

We are seeking for motivated undergraduate students to assist in research (via PSY 499 or as volunteers). If you are interested, please contact Dr. Feng at jing_feng@ncsu.edu
