

# Panel III

What next? Where to from here?

Opportunities? Pitfalls? Other issues

## Panelists:

- Gilbert Baumslag
- Alyson Reeves
- Anna Tsao

# Multidisciplinarity

- CDI is about multidisciplinarity. Is there a mechanism by which scientists who participate can find suitable partners with complimentary perspectives and skills?

# More than Moore?

- We know size and speed matter in the world of computation, but what else do we need to think about if we are to encourage and participate in transformational research projects

- How can the numeric / symbolic computational community be more aggressively effective in working with the rest of the mathematics and science communities?

- Have we paid enough attention to the needs and skills of the social science communities?
- Have we anything to learn from the successes and less-than-successes of past efforts?
