

FACULTY PUBLICATION LIST

H. T. Banks

1. H. T. Banks and N. J. Lybec, "A nonlinear Lax-Milgram lemma arising in the modeling of elastomers", CRSC-TR95-37, November 1995; *Nonlinear Partial Differential Equations*, College de France Seminar, **13** (1998), pp. 1-14.
2. H. T. Banks, M. Demetriou and R. C. Smith, "Utilization of coupling effects in compensator design for structural acoustic systems - Numerical examples", (with CRSC-TR96-24, August 1996; *J. Acoustical Soc. Ameri.*, **103** (1998), pp. 872-887.
3. H. T. Banks, M. W. Buksas and Y. Wang, "A time domain formulation for identification in electromagnetic dispersion", CRSC-TR96-30, October, 1996; *J. Math. Systems, Estimation and Control*, **8** (1998), pp. 257-260.
4. H. T. Banks and M. A. Demetriou, "Adaptive parameter estimation of hyperbolic distributed parameter systems with non-symmetric damping and slowly time varying parameters: Convergence proofs and numerical examples", CRSC-TR96-31, November 1996; *ES-IAM: Control, Optimization and Calculus of Variations*, **3** (1998), pp. 133-162.
5. H. T. Banks and N. J. Lybeck, "A partial differential equation approach to modeling simple extension in elastomers", *J. Math. Systems, Estimation and Control*, **8** (1998), pp. 205-208.
6. K. J. Bachmann, H. T. Banks, N. Sukidi, C. Höpfner, C. Harris, N. A. Dietz, H. T. Tran, S. Beeler and K. Ito, "Real-time monitoring of steady-state pulsed chemical beam epitaxy by p -polarized reflectance", CRSC-TR96-33, December 1996; *J. Crystal Growth*, **183** (1998), pp. 323-337.
7. H. T. Banks and G. A. Pinter, "Approximation results for parameter estimation in non-linear elastomers", CRSC-TR96-34, December, 1996; *Control and Estimation of Distributed Parameter Systems*, Intl Series of Num. Math., (Birkhauser Verlag, Basel), **126** (1998), pp. 1-13.
8. H. T. Banks, Z-H Luo, L. A. Bergman and D. J. Inman, "On the existence of normal modes of damped discrete-continuous systems", CRSC-TR97-5, February, 1997; *ASME J. Applied Mechanics*, **65** Dec. (1998), pp. 980-989.
9. H. T. Banks and R. H. Fabiano, "Approximation issues for applications in optimal control and parameter estimation", CRSC-TR97-11, April, 1997; *Modeling and Computation for Applications in Mathematics, Science and Engineering* (J. W. Jerome, ed.), Oxford University Press, June (1998), pp. 141-165.
10. H. T. Banks, C. J. Musante and H. T. Tran, "A dispersion model for the hepatic uptake and elimination of 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin (TCDD)", CRSC-TR97-29, September, 1997; *Math. and Comput. Modeling*, **28** (1998), 9-29.

11. H. T. Banks and C. J. Musante, “Well-posedness for a class of abstract nonlinear parabolic systems with time delay”, CRSC-TR97-30, September, 1997; *Nonlinear Analysis: Theory, Methods and Applications*, **35** (1998), pp. 629-648.
12. H. T. Banks and R. C. Smith, G. R. Tomlinson and W. A. Bullough, “Hysteresis modeling in smart material systems, in *Smart Materials and Structures*, (G. R. Tomlinson and W. A. Bullough, eds.) IOP Publishing, July (1998), pp. 675-682.
13. H. T. Banks, G. A. Pinter, L. K. Potter, B. C. Muñoz and L. C. Yanyo, “Estimation and control related issues in smart material structures and fluids”, CRSC-TR98-2, January 1998; in *Optimization Techniques and Applications* (L. Caccetta, et al., eds.), Curtain Univ. Press, July (1998), pp. 19-34.
14. H. T. Banks, S. R. Durso, M. A. Goodhart and M. L. Joyner, “On the radio-frequency inputs in dipolar heating of adhesives”, CRSC-TR98-3, January, 1998; *J. Microwave Power and Electromagnetic Energy*, **33** (1998), pp. 231-242.
15. H. T. Banks, B. G. Fitzpatrick, L. K. Potter and Y. Zhang, “Estimation of probability distributions for individual parameters using aggregate population observations”, CRSC-TR98-6, January, 1998; *Stochastic Analysis, Control, Optimization and Applications* (W. McEneaney, G. Yin, and Q. Zhang, eds.), Birkhäuser, (1998), pp. 35-371.
16. H. T. Banks and I. Groselj, “A comparison of noise generation techniques and the effects on inverse problem calculations”, CRSC-TR98-17, April, 1998; *Matimyás Matematika*, Math Society of the Philippines, August (1998), pp. 1-17.

Stephen L. Campbell

1. S. Campbell and K. Yeomans, Behavior of the Nonunique Terms in General DAE Integrators, *Applied Numerical Mathematics*, **28** (1998), 209-226.

Moody T. Chu

1. M. T. Chu, “Inverse eigenvalue problems”, *SIAM Review*, **40** (1998), 1-39.
2. M. T. Chu and Q. Guo, “On the least squares approximation of symmetric-definite pencils subject to generalized spectral constraints”, *SIAM J. Matrix Anal. Appl.*, **19** (1998), 1-20.
3. M. T. Chu and Q. Guo, “A numerical method for the inverse stochastic spectrum problem”, *SIAM J. Matrix Anal. Appl.*, **19** (1998), 1027-1039.
4. M. T. Chu and N. T. Trendafilov, “On a differential equation approach to the weighted orthogonal Process problem”, *Statistics & Computing*, **8** (1988), 125-133.
5. M. T. Chu, “On the optimal consistent approximation to pairwise comparison matrices”, *Linear Alg. Appl.* **272** (1998), 155-168.

E. N. Chukwu

1. E. N. Chukwu, "On the controllability of nonlinear economic systems with delay: The Italian example", *Applied Mathematics and Computation*, **95** (1998), pp. 245-274.
2. E. N. Chukwu, "An electronic appendix containing algorithms and data available form <http://www.elsevier.nl/ame>.
3. E. N. Chukwu, "Volterra integrodifferential dynamics for the growth of wealth of nations; a controllability theory", *Indian J. Pure Applied Math.* **29** (7) pp. 723-799.

Gary D. Faulkner

1. R. E. Chandler and G. D. Faulkner, "Hausdorff compactifications: a retrospective", *Handbook of the History of General Topology* **2**, Kluwer, The Netherlands.

Jean-Pierre Fouque

1. J. P. Fouque, G. Papanicolaou and Y. Samuelides, "Forward and Markov approximation: the strong intensity fluctuations regime revisited", *Waves in Random Media* **8** No. 3 (1998) pp. 303-314.
2. J. Chillan and J. P. Fouque, "Pressure fields generated by acoustical pulses propagating in randomly layered media", *SIAM Journal on Applied Mathematics* **58** No. 5 (1998), pp. 1532-1546.

Pierre A. Gremaud

1. B. Cockburn, P. A. Gremaud and Siangrong Yang, "A Priori error estimates for numerical methods for scalar conservation law. Part III: Multidimensional flux-splitting monotone schemes on non-cartesian grids", *SIAM J. Numer. Anal.*, **35** (1998), pp. 1775-1803.

Robert E. Hartwig

1. R. E. Hartwig and V. Mani, "Generalized polynomial bases and the Bezoutian", *LAA*, (1997) pp. 251: 293-320.
2. R. E. Hartwig and P. Semrl, "Power Additivity and Orthogonality", **SIMAX**, December (1998).

Aloysius G. Helminck

1. A. G. Helminck, "A class of parabolic k -subgroups associated with symmetric k -varieties", *Trans. AMS.*, **350** nr. 1, pp. 4660-6491.

Hoon Hong

1. H. Hong, "Bounds for absolute positiveness of multivariate polynomials", *Journal of Symbolic Computation*, **25** No. 5 May (1998), pp. 571-585.
2. H. Hong, "Groebner basis under Composition I", *Journal of Symbolic Computation* **25** No. 5, May (1998), pp. 643-663.
3. H. Hong and R. Sendra, "Computation of variant resultants quantifier Elimination and Cylindrical Algebraic Decomposition", Texts and Monographs in Symbolic Computation, Springer Verlag, (1998), pp. 327-340.
4. H. Hong and J. Schicho, "Algorithms for Trigonometric Curves", *Journal of Symbolic Computation*, **26** No. 3, September (1998).
5. H. Hong and D. Jakus, "Testing Positiveness of Polynomials", *Journal of Automated Reasoning*, **21** (1998), pp. 23-38.

Ilse Ipsen

1. S. C. Eisenstat and I. Ipsen, "Relative perturbation results for eigenvalues and eigenvectors of diagonalisable matrices", *BIT*, **38** No. 3, (1998), pp. 502-9.
2. I. Ipsen and C. D. Meyer, "The idea behind Krylov methods", *Amer. Math. Monthly*, **105** No. 10, (1998), pp. 889-99.
3. J. M. Banoczi, N. -C. Chiu, G. E. Cho and I. Ipsen, "The lack of influence of the right-hand side on the accuracy of linear system solution", *SIAM J. Sci. Comput.*, **20** No. 1, (1998) pp. 203-27.
4. S. C. Eisenstat and I. Ipsen, "Three absolute perturbation bounds for matrix eigenvalues imply relative bounds", *SIAM J. Matrix Anal. Appl.*, **20** No. 1, (1998) pp. 149-58.

Kazufumi Ito

1. K. Ito and G. Propst, "Legendre-Tau-Pade approximations to the one-dimensional wave equation with boundary oscillators", *Numerical Functional Analysis and Optimization*, **19** (1998), pp. 57-70.

2. K. Ito and S. S. Ravindran, "A reduced order method for simulation and control of fluid flows", *J. Computational Physics*, **143** (1998), 403-425.
3. K. Ito and S. S. Ravindran, "Optimal control of thermally convected fluid flow", *SIAM J. Sci. Comput.*, (1998), pp. 1847-1869.
4. K. Ito and Y. Yan, "Viscous scalar conservation law with nonlinear flux feedback and attractor", *J. Math. Anal. Appl.*, **227** (1998), pp. 271-299.

Naihuan Jing

1. Y. Koyama, N. Jing and K. Misra, "Bosonic realizations of $U_q(C_n^{(1)})$ ", *J. Algebra*, **182** (1998), pp. 448-468.
2. Y. Koyama and N. Jing, "Vertex operators of admissible modules of $U_q(C_n^{(1)})$ ", *J. Algebra*, **205** (1998), pp. 294-316.
3. N. Jing, "Quantum Kac-Moody algebras and vertex representations", *Lett. Math. Phys.*, **44** No. 4, (1998), pp. 261-271.
4. J. Beck, I. Frenkel and N. Jing, "Canonical basis and Macdonald polynomials", *Adv. in Math.*, **140** (1998), 95-127.

Erich Kaltofen

1. E. Kaltofen and V. Shoup, "Subquadratic-time factoring of polynomials Over finite fields", *Mathematics of Computation*, **67**, July (1998), pp. 1179-1197.

C. T. Kelley

1. C. T. Kelley and E. W. Sachs, "Local convergence of the symmetric rank-one iteration", *Computational Optimization and Applications*, **9** (1998), pp. 43-63.
2. J. M. Banoczi and C. T. Kelley, "A fast multilevel algorithm for the solution of nonlinear systems of conductive-radiative heat transfer equations", *SIAM J. on Sci. Comput.*, **19** (1998), pp. 266-279.
3. C. T. Kelley, C. T. Miller and M. D. Tocci, "Termination of Newton/chord iterations and the method of lines", *SIAM J. on Sci. Comput.* **19** (1998), pp. 280-290.
4. C. T. Miller, G. A. Williams, C. T. Kelley and M. D. Tocci, "Robust solution of Richards' equation for non-uniform porous media", *Water Resources Research*, **34** (1998), pp. 2599-2610.
5. C. T. Kelley and D. E. Keyes, "Convergence analysis of pseudo-transient continuation", *SIAM J. Numer. Anal.*, **35** (1998), pp. 508-523.

Zhilin Li

1. Z. Lin, “A fast iterative algorithm for elliptic interface problems”, *SIAM J. Numer. Anal.*, **35** (1998), pp. 230-254.
2. Z. Lin, “The immersed interface method using a finite element formulation”, *Applied Numer. Math.*, **27** (1998), pp. 253-267.
3. Z. Lin and J. Zou, “Theoretical and numerical analysis on a thermo-elastic system with discontinuities”, *J. of Comput. Appl. Math.*, **91** (1998), pp. 1-22.

Sharon Lubkin

1. J. D. Murray, J. Cook, R. Tyson, S. R. Lubkin, “Spatial pattern formation in biology: I. Dermal wound healing II. Bacterial patterns”, *Journal of the Franklin Institute*, **335B(2)** (1998) pp. 303-332.

Jiang Luh

1. J. Luh and Youpei Ye, “Derivations of higher order in semiprime rings”, *J. Math. and Math. Sci.*, **21** (1998), pp. 89-92.

William M. McEneaney

1. W. M. McEneaney, G. Yin and Q. Zhang, “Stochastic Analysis, Control, Optimization and Applications: A Volume in Honor of W. H. Fleming, Birkhauser Systems and Control Series, (1998).
2. W. M. McEneaney, “Robust/ H_∞ filtering for nonlinear systems”, *Systems and Control Letters*, **33** (1998), pp. 315-325.
3. W. M. McEneaney, “A uniqueness result for the Isaacs equation corresponding to Nonlinear H_∞ control”, *Math. Controls, Signals and Systems*, **11** (1998), 303-334.

Carl Meyer

1. D. J. Hartfiel and C. Meyer, “On the structure of stochastic matrices with a subdominant eigenvalue near 1”, *Linear Algebra and Its Appl.*, **272** (1998), pp. 193-203.
2. I. Ipsen and C. Meyer, “The idea behind Krylov methods”, *American Mathematical Monthly*, **105** No. 10, December (1998), pp. 889-899.

Kailash C. Misra

1. K. C. Misra and Foda, Okado, “Demazure modules and vertex models: The $\widehat{sl}(2)$ -case”, *J. Math. Phys.*, **39** (1998), 1601-1622.
2. K. C. Misra, Kuniba, Okado, and Uchiyama, “Demazure modules and perfect crystals”, *Commun. Math. Phys.*, **192** (1998), pp. 555-567.
3. K. C. Misra, Kuniba, Okado, Tagagi, and Uchiyama, “Characters of Demazure modules and solvable lattices models”, *Nuclear Physics B*, **510**, [PM] (1998), pp. 555-576.
4. K. C. Misra, Kuniba, Okado, Tagagi, and Uchiyama, “Crystals for Demazure modules of classical affine Lie algebras”, *Journal of Algebra*, **208** (1998), pp. 185-215.
5. K. C. Misra and Jing, Koyama, “Bosonic Realizations of $U_q(C_n^{(1)})$ ”, *Journal of Algebra*, **200** (1998), pp. 155-172.

C. V. Pao

1. C. V. Pao, “Monotone iterations for numerical solutions of reaction-diffusion equations with time delay”, *Numerical Methods for Partial Differential Equations*, **14** (1998), pp. 339-351.
2. C. V. Pao, “Accelerated monotone iterative methods for finite difference equations of reaction-diffusion”, *Numerische Mathematik*, **79** (1998), pp. 261-281.
3. C. V. Pao, “Monotone methods for a finite difference system of reaction diffusion equation with time delay, in Advances in Diffusion Equations II”, *Computers and Mathematics with Applications*, **36** (1998), pp. 37-47.
4. C. V. Pao, “Dynamics of a finite difference system of reaction diffusion equations with time delay”, *Journal of Difference Equations and Applications*, **4** (1998), pp. 1-11.
5. C. V. Pao, “Asymptotic behavior of solutions of reaction-diffusion equations with nonlocal boundary condition”, *Journal of Computational and Applied Mathematics*, **88** (1998), pp. 225-238.
6. C. V. Pao, “Parabolic systems in unbounded domains. I. Existence and dynamics”, *Journal of Mathematical Analysis and Applications*, **217** (1998), pp. 129-160.
7. C. V. Pao, “Parabolic systems in unbounded domains, II. Equations with time delay”, *Journal of Mathematical Analysis and Applications*, **235** (1998), pp. 557-586.

Mohan Putcha

1. M. Putcha, “Complex representations of finite monoids II. Highest weight categories and quivers”, *Journal of Algebra* **205** (1998), pp. 53-76.

2. M. Putcha, “Conjugacy classes and nilpotent variety of a reductive monoid”, *Canadian Journal of Mathematics* **50** (1998), pp. 829-844.
3. M. Putcha, “Monoid deformations and group representations”, *Journal of Pure and Applied Algebra* **132** (1998), pp. 159-178.

Jesus Rodriguez

1. D. L. Etheridge and J. Rodriguez, “Scalar discrete nonlinear two-point boundary value problems”, *Journal of Difference Equations and Applications*, **4** (1998), pp. 127-144.

Jeffrey S. Scroggs

1. J. -H. Qian, F. Semazzi and J. Scroggs, “A global nonhydrostatic semi-lagrangian atmospheric model with orography”, *Monthly Weather Review*, **126** (1998), pp. 747-771.

James F. Selgrade

1. J. F. Selgrade, “Using stocking or harvesting to reverse period-doubling bifurcations in discrete population models”, *Jour. of Difference Eq. and Applications*, **4** (1998), pp. 163-183.
2. James Roberds and J. F. Selgrade, “Reversing period-doubling bifurcations in models of population interactions using constant stocking or harvesting”, *Canadian Appl. Math. Quarterly*, **6** (1998), pp. 207-231.

Michael Shearer

1. F. X. Garaizar, M. K. Gordon and M. Shearer, “An elastoplasticity model for antiplane shearing with a non-associative flow rule: Genuine nonlinearity of plastic waves”, *J. Math. Anal. Appl.*, **219** (1998), pp. 344-363.
2. L. Howle, D. G. Schaeffer, M. Shearer and P. Zhong, “Lithotripsy: the treatment of kidney stones with shock waves”, *SIAM Review* **40** (1998), pp. 356-371.
3. D. G. Schaeffer and M. Shearer, “A simple model for stress fluctuations in plasticity with application to granular materials”, *SIAM J. Appl. Math.*, **58** (1998), pp. 1791-1807.
4. Y. Horie, O. J. Schwarz and M. Shearer, “Discrete element investigation of stress fluctuation in granular flow at high strain rates”, *Phys. Review E* **57** (1998), pp. 2053-2061.

C. E. Siewert

1. L. B. Barichello and C. E. Siewert, “The F-N method for spectral-line formation by completely noncoherent scattering”, *JQSRT*, **60** (1998), pp. 261-276.
2. R. D. M. Garcia and C. E. Siewert, “The F-N method for multigroup transport theory with up-scattering”, *NSE*, **130** (1998), pp. 261-276.
3. L. B. Barichello and C. E. Siewert, “A computation of the X and Y Functions for a non-grey model with complete frequency redistribution”, *JQSRT*, **60** (1998), pp. 649-656.
4. L. B. Barichello and C. E. Siewert, “On the equivalence between the discrete-ordinates and the spherical-harmonics methods in radiative transfer”, *NSE*, **130** (1998), pp. 79-84.

Jack W. Silverstein

1. Z. D. Bai and J. W. Silverstein, “No eigenvalues outside the support of the limiting spectral distribution of large dimensional sample covariance matrices”, *Annals of Probability*, **26** No. 1, (1998), pp. 316-345.

Ralph C. Smith

1. H. T. Banks, M. A. Demetriou and R. C. Smith, “Utilization of coupling effects in compensator design for structural acoustic systems”, *Journal of the Acoustical Society of America*, **103** (1998), pp. 872-887.
2. R. C. Smith, “Hysteresis modeling in magnetostrictive materials via preisach operators”, *Journal of Mathematical Systems, Estimation and Control*, **8** (2), (1998).

Ernest Stitzinger

1. Pete Hardy and E. Stitzinger, “On characterizing nilpotent Lie algebras by their multipliers, $t(L)=3,4,5,6$ ”, *Communication in Algebra*, **26** pp. 3527-3539.

Hien T. Tran

1. H. T. Banks, C. J. Musante and H. T. Tran, “A dispersion model for the hepatic uptake and elimination of 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin”, *Mathematical and Computer Modeling*, **28** (1), July (1998), pp. 9-29.

William M. Waters

1. W. Waters, A. G. Clark and T. Branoff, “Using Geometry to verify a CAD Solution”, *Journal for Geometry and Graphic*, Institute for Geometry, Vienna University of Technology.
