

LaTeX demo homework

- Download `template.tex`
- typeset the equations from class notes of ecg 590i at the top of page 8 (don't do the 4th line of the equation with the curly brace – we will learn that next time)
- Put your name & unity id near the top.
- Email the file to Dr. Scroggs

(If you don't do this by Thursday at 5pm, don't come to the seminar on Friday)
